DETAILED ACTION**Response to Arguments**

The Applicant has disagreed with the previous restriction. The examiner has considered the arguments and finds them to be persuasive. The application will now be further examined and restricted in this Office Action. This restriction details multiple patentably distinct species, wherein the species are of different formations of the underlying layer of an electrode pad. The specification also supports this restriction requirement on pages 3-10, where it is taught that the species listed below are different embodiments.

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I,	Figures 1 & 4;	Species XI,	Figure 18;
Species II,	Figures 2 & 5;	Species XII,	Figure 19;
Species III,	Figures 3 & 6;	Species XIII,	Figures 21 & 23;
Species IV,	Figures 7 & 8;	Species XIV,	Figures 22 & 24;
Species V,	Figures 9 & 12;	Species XV,	Figures 26, 32, & 38;
Species VI,	Figures 10 & 13;	Species XVI,	Figures 27, 33, 39 & 44;
Species VII,	Figures 11 & 14;	Species XVII,	Figures 28, 34, & 40;
Species VIII,	Figure 15;	Species XVIII,	Figures 29, 35, 41 & 45;
Species IX,	Figure 16;	Species XIX,	Figures 30, 36 & 42;
Species X,	Figure 17;	Species XX,	Figures 31, 37, & 43.

Art Unit: 2826

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently there are no generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
